

Life Science Consulting joins TF Instruments as sales partner

January 2006: Life Science Consulting joins TF Instruments as a sales partner in the area of characterization and optimization of pharmaceutical formulations.

TF Instruments Inc. (Monmouth Junction, NY, USA) and LSC Life Science Consulting (Itingen, Schweiz) agreed upon a marketing cooperation. LSC will contribute by supporting TFI exclusively in the field of the ResoScan® Research System sales on the European level.

The ResoScan® Research System is based on a novel analytical method providing among further features advantages for the characterization and optimization of pharmaceutical formulations. This means that fluid samples can be analysed with a very high resolution without dilution and label-free.

In the course of the marketing cooperation LSC will cover the contacting in the area of formulation development.
